

Manoj Depuri Product/UX/UI Designer

manojdepuri019@gmail.com | Orlando, FL | +1 (216) 256-3059 | [linkedin.com/in/manoj-depuri](https://www.linkedin.com/in/manoj-depuri) | [Portfolio](#)

Profile Summary

Product Designer and UI/UX Designer with 3+ years of experience designing and shipping SaaS, healthcare, and consumer web and mobile products. Improved task completion by up to 20% by simplifying complex workflows through research, prototyping, usability testing, and accessible design. Partner closely with product and engineering teams to ship scalable interfaces, with a growing focus on 0-to-1 products and design systems.

SKILLS

Design & Prototyping: Figma (Design Systems, Auto Layout, Components, Variables), Adobe XD, Framer, Webflow, Anima, Interaction Design, Visual Design, Responsive Design, Mobile & Web Design, High-Fidelity Mockups, Prototyping

UX Research & Testing: User Research, User Interviews, Usability Testing, A/B Testing, Heuristic Evaluation, Competitive Analysis, Persona Development, Journey Mapping, Affinity Mapping, Google Analytics

UX Foundations: Wireframing, User Flows, Information Architecture, Design Systems, Component Libraries, Accessibility (WCAG 2.2), Inclusive Design, Accessibility Audits, Human-Centered Design (HCD), Typography, Microinteractions, Design Thinking

Technical: HTML5, CSS3, JavaScript (ES6+), React, REST APIs, Git, GitHub, Design Handoff, Agile, Scrum

Collaboration & Project Management: FigJam, Miro, Jira, Confluence, Stakeholder Management, Developer Collaboration, Documentation, Sprint Planning

Professional Experience

Product Designer, Hubspot

Mar 2026 – Present | USA

- Owned the redesign of core CRM card components and record-management patterns, simplifying dense legacy layouts and improving visual hierarchy, interaction consistency, and usability across key workflows.
- Redesigned search, navigation, and AI-assistant entry experiences, using user flows, prototyping, and usability feedback to improve feature discovery and simplify complex CRM tasks.
- Partnered with a 4-person design team, Product Managers, and engineers to modernize reusable interface components, reduce legacy design debt, and create more consistent, scalable product patterns.
- Validated design decisions through usability testing, accessibility reviews, and product analytics, refining responsive behavior, interaction states, and WCAG-aligned patterns while delivering detailed specifications for engineering handoff.

Website Design and Support Assistant, Cleveland State University

Jan 2025 – May 2025 | USA

- Contributed to redesign of Cleveland State University's CampusNet portal, improving course search, registration, add/drop, and schedule-management workflows to reduce friction for students.
- Redesigned the course-registration experience in Figma, simplifying information hierarchy, course-selection states, form interactions, prerequisite messaging, and registration-hold/error states.
- Created responsive and WCAG-aligned UI patterns, improving navigation, accessibility, interaction consistency, and clarity across desktop and mobile CampusNet experiences.
- Built reusable components, interactive prototypes, and engineering handoff specifications, collaborating with university stakeholders and developers through design reviews and implementation.

UI/UX Developer, Quality Excellence

Aug 2022 – Jul 2024 | Hyderabad, India

- Led end-to-end UI/UX design for SaaS web and mobile products across healthcare, education, transportation, and IT, translating research and business requirements into user flows, wireframes, prototypes, and production-ready interfaces.
- Contributed to and helped maintain a shared Figma design system of 30+ components, personally designing or significantly updating 20–25 components (buttons, inputs, dropdowns, cards, tables, navigation, modals) with Auto Layout, variants, and documentation for team-wide reuse
- Conducted before/after usability testing on core workflows (8 participants per round), improving task success from 72% to 86% by simplifying navigation, information hierarchy, and interaction states based on observed friction points.
- Identified and resolved accessibility issues through design reviews and audit tracking, including redesigning color-only status indicators to include text labels and icons alongside adjusted contrast, ensuring WCAG-aligned, non-color-dependent status communication.
- Partnered with Product Managers and engineers, applying frontend knowledge (HTML, CSS, JavaScript, React) to improve technical feasibility and streamline design handoff.

PROJECT

BEWAZ - Product Designer (Independent)

- Designed the full UX/UI in Figma for a live restaurant ordering platform and used AI-assisted development to bring it to a working, deployed product. Owned the project end-to-end from research through live launch on a custom domain.

EDUCATION

Master of Science in Computer Science, Cleveland State University

Aug 2024 – May 2026 | USA

Bachelor of Technology, Marri Laxman Reddy Institute of Technology & Management

Jul 2019 – Aug 2023 | India
