Executive Summary

Frontend Developer with **3 years of experience** building and supporting **large-scale, globally used web applications** with **React, Next.js, TypeScript, JavaScript, HTML5, and CSS3**. Experienced in **REST/GraphQL API integration, Redux-based state management, responsive design, WCAG accessibility**, and automated testing with **Jest, React Testing Library, and Playwright**. Improved application performance through **code splitting, lazy loading, caching, and bundle optimization**, reducing load times by **up to 38%** and improving frontend reliability. Skilled in **CI/CD, Git, Docker, cloud-based deployments, and production monitoring** for customer-facing applications.

Experiences

Frontend Engineer | Quality Excellence | Hyderabad, India

Aug 2022 – July 2024

- Engineered a **Next.js/React/TypeScript booking platform** serving **2M+ monthly users across 25+ countries**, supporting localized search, property discovery, reservations, account management, and responsive web experiences across desktop and mobile.
- Designed a **modular frontend architecture** using reusable React components, custom hooks, TypeScript interfaces, and feature-based modules, reducing duplicated UI code by **~32%** and accelerating delivery of new booking workflows.
- Optimized **Core Web Vitals** through Next.js SSR/ISR, route-level code splitting, dynamic imports, image optimization, caching, prefetching, and lazy loading, reducing median page-load time by **~38%** and improving LCP from **3.1s to 2.0s**.
- Implemented complex client-side state using **Redux Toolkit, RTK Query, and React Context**, managing search filters, authentication, booking sessions, pricing, and cached API data while reducing unnecessary API requests by **~27%**.
- Integrated **GraphQL and REST APIs** for availability, dynamic pricing, customer profiles, loyalty accounts, payments, and reservations, adding request cancellation, retries, optimistic UI updates, and standardized error handling that lowered customer-facing API errors by **~21%**.
- Built checkout and payment experiences with secure tokenized payment integrations, input validation, route protection, **CSP, XSS mitigation, secure cookie handling, and OAuth/OIDC authentication**, contributing to a **~9% reduction in abandonment**.
- Created an accessible design system aligned with **WCAG 2.1 AA**, implementing semantic HTML5, ARIA attributes, keyboard navigation, screen-reader support, focus management, and automated accessibility checks across shared components.
- Expanded automated quality coverage using **Jest, React Testing Library, and Playwright**, increasing critical-flow test coverage from **68% to 86%** and reducing production regressions affecting search, login, and checkout by **~24%**.
- Improved frontend delivery through **Git, Docker, GitHub Actions/Jenkins CI/CD, automated linting, testing, bundle analysis, and preview deployments**, reducing average production deployment time by **~40%** while supporting multiple releases per week.
- Instrumented production applications with **Sentry, CloudWatch, Web Vitals, and analytics event tracking**, using error rates, conversion funnels, and performance telemetry to identify bottlenecks that reduced JavaScript bundle size by **~26%** and improved booking conversion by **~6%**.

Education

Cleveland State University - Master's in Computer Science

May 2026

Projects

- Customer Testimonial Collection & Display Platform:** Built a scalable customer testimonial management system using React.js, Node.js, and MongoDB, improving brand trust and engagement. Engineered an embeddable widget system with customizable layouts and role-based access control (RBAC) for seamless integration across websites. Implemented real-time analytics dashboards using D3.js, enabling data-driven decisions on user interaction.
- Custom UI Component Library for React/Next.js (UI Components):** Developed a suite of 20+ reusable, themeable, and accessible components with TypeScript, Tailwind CSS, and Framer Motion. Architected a CLI for seamless integration into React and Next.js projects and documented the library in Storybook to accelerate developer onboarding. Automated build and publishing pipelines via GitHub Actions, cutting initial project setup time by 50%.
- AI-Driven Website UI Cloning & Rapid Prototyping with same.dev:** Automated the cloning of complex website interfaces into modular React/Tailwind/Vite codebases with pixel-perfect precision in under five minutes, reducing manual front-end development effort by 80%. Integrated the generated output into Next.js projects to enable responsive layouts, rapid iteration, and seamless customization across devices. Refactored AI-generated code to enforce consistent linting standards, modular component structure, and include custom business logic for production readiness.

Skills

- Languages:** Python, JavaScript (ES6+), TypeScript, HTML5, CSS3
- Frontend Frameworks & Libraries:** React.js, Next.js, React Hooks, Redux Toolkit, React Router
- UI & Styling:** Responsive Web Design, CSS Modules, Sass/SCSS, Tailwind CSS, Material UI, Flexbox, CSS Grid
- State Management:** Redux Toolkit, RTK Query, React Context API, Local/Session Storage
- APIs & Integration:** REST APIs, GraphQL, Apollo Client, JSON, Axios, Fetch API, OAuth 2.0, JWT
- Testing:** Jest, React Testing Library, Cypress, Playwright, Unit Testing, Integration Testing, End-to-End Testing
- Tools & Platforms:** Git, GitHub, GitLab, npm, Yarn, Vite, Webpack, Docker, Postman, Chrome DevTools, Figma
- Cloud & Deployment:** AWS, CloudFront, S3, Vercel, Netlify, CI/CD, GitHub Actions, Jenkins

Certifications

- AWS Certified Developer – Associate (DVA-C02)
- Certified Kubernetes Administrator (CKA)
